DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Larsson. Larsson shows an automatically controlled multi-axis manipulator for a processing tool (the spray nozzle), comprising a first hollow member (15b, 16 and the extension from 16) and a second hollow member 15a, wherein the first member on which the processing tool to be moved by the manipulator is arranged, can be turned relative to the second member, and with a line arrangement 27 as recited, wherein part of the processing tool on which the line arrangement is fixed is supported in a rotatable fashion relative to the first component member. Part of the processing tool on which the line arrangement is fixed is rotatable supported in an outer housing 17 that is rigidly connected to the first component member as recited in claim 2.

Allowable Subject Matter

3. Claims 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Shah, Weinstein, and Vecellio are pertinent to Applicant's invention.
